Dear Principal / CAT Head of Department / IT Department

The I-CAN Centre / Genesis Community IT Initiative is proud to present their 1<sup>st</sup> Spring School for Grade 12 Computer Application Technology (CAT) students to be held at the I-CAN Centre in the upcoming October 2017 school break. This Spring School is a follow-up after the great success of the Winter School that was held during the June/July 2017 school break where 51 students enrolled and 46 students obtained international certification for IC3-Digital Literacy and Microsoft Office Specialist Word.

The aim of the spring school is to support Grade 12 learners with certain components of the school curriculum. We wish to grasp this opportunity, in the form of our spring school, to extend a helping hand towards the students' success which will be the school's success. Thus the holistic aim of the I-CAN Digital Spring School is to add value, support learning, improve results and ignite a passion for information technology (IT) to Grade 12 Computer Application Technology (CAT) learners. Learners who participate in the programme will receive international certification which will be conducted online through the Certiport console (platform / portal).

**Grade 12 students** will have the opportunity to enroll for a course in Microsoft Office Specialist (MOS) Word or Excel. In these courses they will test their existing knowledge and practical experience in the applications and also to enhance their knowledge, understanding and practical experience on an international level.

We hereby call upon you to support us in this Digital Spring School to add value to students' curriculum and lift the standard of their digital experience. Certification will prove that successful students are world class as students will be completing online international exams conducted on the Certiport platform.

As these courses are also used as teaching blocks of the Genesis CITI six months and one year courses, the highest academic and practical standards are maintained.

The cost of courses are kept to an absolute minimum, to allow for the fullest participation in order to empower your students which is our youth and the future leaders.

Should you require any further information or to set up a meeting for further discussion, please feel free to contact me, Mr Llewellyn Scholtz on 079 859 0539 or email – [llewellyn@g-citi.org](mailto:llewellyn@g-citi.org). Please feel free to visit our winter school website at [www.springschool.i-can.org.za](http://www.springschool.i-can.org.za)

Thanking you in advance for your support and cooperation

Llewellyn Scholtz
